

## CHALLENGE #1:

Merging data from multiple providers/ organizations and disparate EHRs into one comprehensive health record

## CHALLENGE #2:

Patient portals are a REQUIREMENT for Meaningful Use.

## SOLUTION:

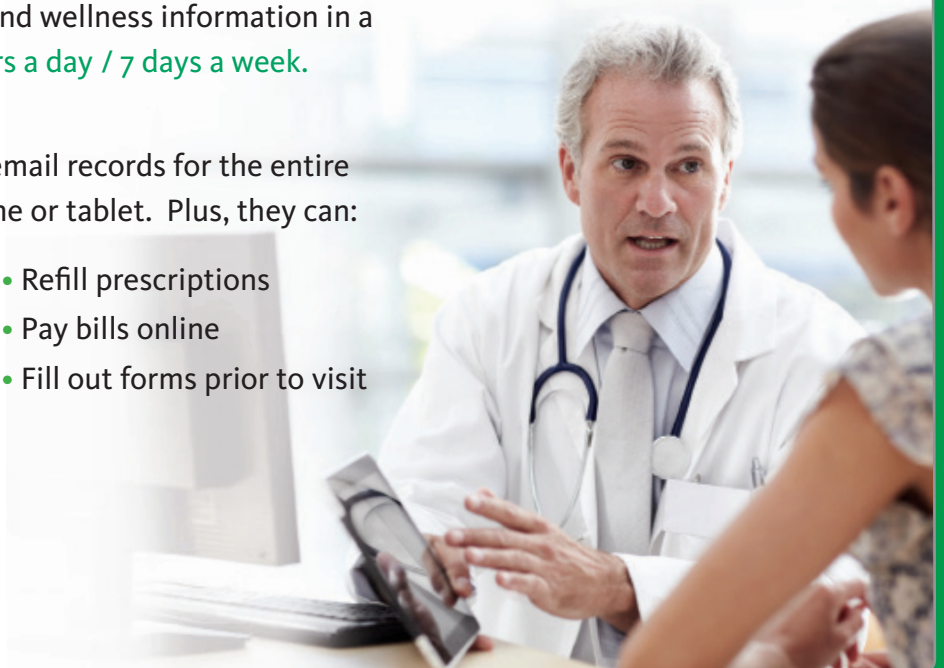

FollowMyHealth™ Universal Health Record – a patient engagement solution that combines the value of a personal health record, the power of a patient portal and the connectivity of a health information exchange (HIE).

FollowMyHealth is used by healthcare organizations and physicians across the nation as the “power” behind their hospital or clinic’s specific patient portal – and the tool they’ll use to achieve Meaningful Use.

FollowMyHealth empowers providers to engage patients so they can access and manage their health and wellness information in a secure, online environment – 24 hours a day / 7 days a week.

Patients can easily download, fax or email records for the entire family from any computer, smartphone or tablet. Plus, they can:

- View test results
- Request appointments
- Communicate with physicians
- Refill prescriptions
- Pay bills online
- Fill out forms prior to visit

## “Most-Used, Best-of-Breed Portal”

– As reported by KLAS  
Information Week, Jan. 2013

*“The biggest barrier that patients encounter with traditional PHRs is manually entering and maintaining their personal health information. With FollowMyHealth, all of the patient’s information that is stored in the EHR can easily populate and remain synchronized with their record.”*

– Central Utah Clinic

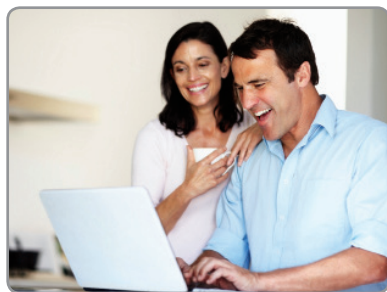

## Features

- Built in accuracy and security with Enterprise Master Patient Index (EMPI)
- EMR-agnostic / Discrete data flows back into EHR
- Configurable release thresholds for results/documents
- Customize settings/functionality by organization or provider

## Benefits

- Patient-owned, patient-controlled
- Seamless integration streamlines clinical operations and workflows
- No on-site hardware/software maintenance produces significant cost savings
- Sending forms prior to visit populates record – saves administrative time and money

## Patients Want to be Engaged

- 90%** prefer web-based access to health information and education
- 72%** want to book, change or cancel physician appointments online
- 88%** want to receive email reminders for preventative or follow-up care
- 76%** want the option of email consultations with doctors

*Accenture survey of more than 1,100 U.S. patients*
